

Dan L. BBB Review

1/2/2017

My wife and I had 4 estimates/inspections done before we had Scott \*\*\*\*\* at GreenPoint come look at our historic home's roof. Our roof had several challenges in a variety of pitched and flat surfaces. Right away, we felt Scott was straight-forward and honest with his assessment and was extremely professional in his approach to informing us of his evaluations. He took us carefully through his inspection, treated us as equals, and listened intently to our questions. Consequently, his crew was knowledgeable, hard-working, and did a great job. His presence on the job site was always positive and helpful. Any oversight or adjustment was explained carefully, taken care of in a completely professional manner, and all work was and still is guaranteed. Scott and his foreman came back a year later to inspect the work and answer any questions or evaluate any issues that we had. They went far beyond and above expectations to make sure the job was done right, done well, and done to our satisfaction. We are completely satisfied with GreenPoint Roofing: with their quality materials, their quality work, and especially with their integrity exemplified by their lead inspector and boss, Scott \*\*\*\*\* . Give them top consideration when considering roofing work of any kind, especially in a time where roofers are looking for the quick, cheap fix. GreenPoint Roofing is the real deal in quality roofing.
