

To anyone hiring a roofer in the Denver Area:

As Corporate Construction Manager for the investment firm Green Leaf Partners, I negotiate contracts manage major roofing projects at large apartment complexes across the country.

Last year GreenPoint Roofing completed a re-roof project at our 240 unit complex, Green Leaf Riverside, located at 4957 South Prince Court in Littleton, Colorado. They completed full roof replacements with full tear off on 21 existing buildings and 13 carports. They removed and replaced over 100 skylights.

GreenPoint Roofing exceeded my expectations by an order of magnitude, and I have a reputation for being a perfectionist and very demanding. They got all of the proper permits, communicated well with our local management, showed up on time, did a great job and cleaned up the jobsite everyday. They processed change orders quickly and efficiently. Their prices were fair and reasonable. We did not have a single complaint from a resident. Best of all we have not had a single leak since the project. The roofs look great.

I would hire them again. They are the best roofing company with which I have had the pleasure to work anywhere in the country. In fact, I frequently wish I could avail myself of their services in other regions of the country. Hire them. You will not regret it.

David C. Burrill
